

PROBITY TECHNOLOGIES PRIVATE LIMITED

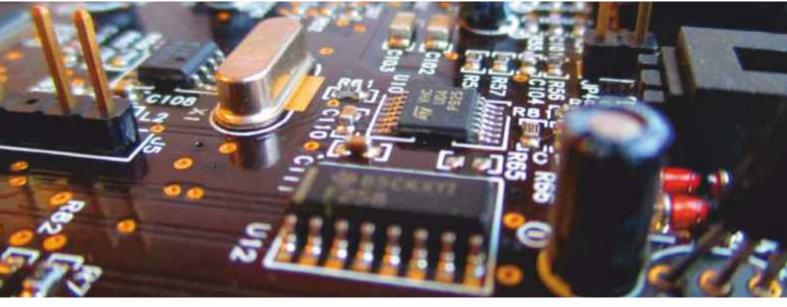

Your partner to build & uphold digital enterprise

Probity Technologies assists manufacturers to solve complex problem using digital solutions. We add unprecedented value to your business by using modern industry 4.0 technologies which are both effective & user friendly.

Traceability

❖ Incoming Raw Material

- Raw material like steel having a label with details like GRN No., GRN Date, Invoice No. & QR Code on label
- Quality Check
- Gate entry into factory
- Rack Locations
- Issue for production

Production

- Flow of material between multiple manufacturing station
- QR Scanner scanning the material
- Child parts assigned at every station
- BOM wise material consumption
- Capturing data from test equipment
- Final printing "OK label on part"

Dispatch

- Multi level packaging of FG
- Model wise standard packaging control
- Pre dispatch inspection
- Part weight
- Packaging slip & container management

Raw Material

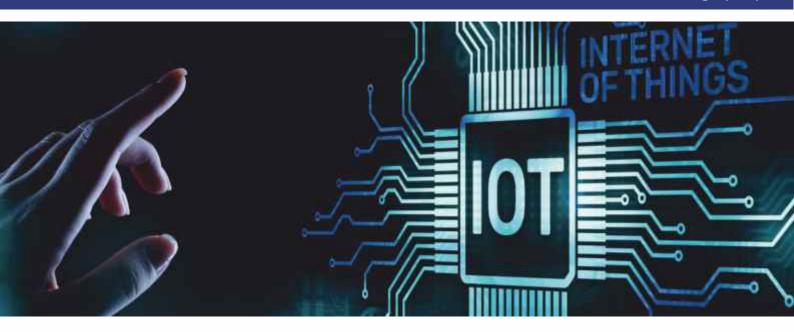

Production

QR / Barcode Scanner

Dispatch & container management

Smart Production System

- Capture production & rejection datafrom machine
- Monitor Plan vs Actual production.
- Tool & Die Life Monitoring
- Operator efficiency
- Auto OEE & OLE

Smart Maintenance System

- Auto schedule downtime based on predefined parameters
- Spare part , check sheets associated with machines

Smart Quality Systems

- Capture process data from equipment
- Capture part test result data
- Associate quality data with traceability

APQP & ECM

- Generate RFQ
- Create Cross functional teams
- Ensure structured information flow between multiple gates
- Capture engineering data at multiple gates and generate data warehouse
- Risk analysis & risk mitigation
